

1-core single-mode fiber optic transceiver

Overview

These transceivers are engineered for long-distance applications, supporting distances from 10 km to 180 km depending on the model and wavelength. They are compatible with a variety of networking devices, including those from Cisco, and are available with LC Duplex and LC Simplex. In optical modules, "core" refers to the light-transmitting channel in the fiber. A 1-core module uses a single fiber core for data transmission, while a 2-core module uses two cores. 25G speed, SC/LC connectors, up to 80km reach, CE certified, ideal for FTTX and data centers. Single-mode SFP and multimode SFP are the two main types of hot-pluggable optical transceivers used in fiber optic networks., from 100m to 160km, for 1G switches, routers, servers, NICs and other transmission equipment. 30-Day. Cisco Transceiver Modules - Learn product details such as features and benefits, as well as hardware and software specifications. WAVELENGTH: The one pair SC WDM transceivers with TX1310nm/RX1550nm (blue color) and TX1550nm/RX1310nm (yellow color). Compliant with SFP MSA and SFF-8472. WIDE COMPATIBILITY: Widely used.
