

Adjustable Fiber Optic Cable Take-up and Drop-off Stand

Overview

The ALRS is a highly portable, folding A-frame stand used for paying out and retrieving cable (both copper and fiber optic) in a harsh environment. Designed for quick and easy deployment and operation, the ALRS requires no tools for set up. Answer Summary: A fiber optic stand with adjustable arms, a. OCC's MARS ALRS series of Lightweight Reel Stands represent a significant advancement in cable deployment and retrieval technology. Designed for quick. Our unique Cable Management Bracket fits securely on either side of the workbench, allowing jacketed strands to stay put and separated until you need them. Separate the work surface from the stand and quickly attach the two unique stand-off props with adjustable webbing into the 4 accessory slots. Windak designs and manufactures a wide variety of portal type traversing pay-offs (OW) and take-ups (UW) for the wire and cable industry. A number of default features, such as independently controlled UP/DOWN pintles, motorized pintle opening and closing, and an HMI touch screen, grant these. There are a variety of cable take-ups available, from smaller 800 mm reels to larger 2400 mm reels. Most of these take-ups are driven with an AC Vector motor with either traversing reels or a traversing guide arm.
