

Burkina Faso Vertical Explosion-proof Distribution Box Specifications

AI Overview

BXM(D) series vertical explosion-proof distribution boxes provide safe power and lighting distribution in hazardous areas with flexible configurations, high protection ratings, and compliance with international explosion-proof standards.

Key Specifications

Protection Type: The BXM(D) series combines flameproof (Ex d) and increased safety (Ex e) protection, suitable for explosive gas and dust atmospheres in Zone 1 and Zone 2 environments.

Voltage and Current Ratings: AC Voltage: Up to 690V, 50/60Hz DC Voltage: Up to 500V

Main Switch Ratings: 80A-250A

Branch Switch Options: 1P, 2P, 3P without earth leakage protection

Enclosure Material and Protection: Material: Stainless steel or customizable per user requirements

Ingress Protection: IP65/IP66 for dust and water resistance

Cable Entries: Flexible, with options for multiple sides and sizes; cable glands available on request

Outdoor Use: Optional rainproof canopy or protective cover

Internal Configuration: Supports circuit breakers, contactors, relays, PLC systems, and other modular components

Pre-wired to terminal blocks with international brand explosion-proof terminals

Internal components can be selected based on project requirements, including BL8060 series breakers and BRT8060 series fuses

Operation and Safety Features: Main and branch switches operated via external rotary actuators

Switch handles can be padlocked to prevent unauthorized operation

Color-coded panels for easy identification of main and sub-switches

Electrical schematic diagrams can be customized and provided by the user

Certifications and Standards: Designed according to IEC international standards and ATEX EU standards

Many models also comply with IECEx certification for international use

Suitable for industries such as oil & gas, chemical plants, offshore platforms, and dust hazardous environments

Customization Options: Custom sizes a...
