

Cable Tray Welding Specialized Machine

Overview

The Cable Tray Welding Machine, a pneumatic device featuring European design technology, efficiently welds double meshes up to 120 times per minute and offers customization based on specific mesh drawings, enhancing cable management efficiency. These machines use advanced welding technology to fabricate cable trays by joining metal strips or wires into a. The DAPU cable tray welding machine uses advanced pneumatic welding technology. It uses a number of the most well-known domestic and international electronic components from Siemens/Panasonic PLC of Germany, Schneider Electric of France, and Panasonic servo motors of Japan, among others. Featuring automatic welding, a user-friendly interface, and durable components, this machine is ideal for. This machine is specially designed for the wire mesh cable tray production line. Designed to match your specs and budget, our systems prioritize efficiency, productivity, rapid changeovers, and rock-solid reliability — all backed by world-renowned service and support.
