

Cable tray exit

AI Overview

A cable tray exit is a component that safely guides cables out of a cable tray system while protecting them from damage and maintaining proper bend radius. Purpose of a Cable Tray Exit Cable tray exits are used to route cables from the main cable tray or ladder to downstream equipment, junction boxes, or termination points. They ensure that cables are not pinched, bent excessively, or damaged at the point where they leave the tray, which is critical for maintaining cable integrity and performance in power, control, and communication systems.

Types of Cable Tray Exit

Components
Exit Plates / Drop-Out Plates Also called outgoing plates, these are typically made from steel, stainless steel, or galvanized steel. They are mechanically fixed to the tray or ladder and provide a smooth, rounded edge to prevent abrasion of cable insulation. Available in various widths (e.g., 200mm to 600mm) to match the tray size. Can be installed at the end of a tray or along the side rails to allow cables to exit at different angles, often supporting $\pm 45^\circ$ routing.
Exit Clips / Dropout Waterfalls Designed for wire mesh trays, these clips maintain the proper bend radius when cables drop vertically or horizontally. They snap onto the tray without additional hardware and can be expanded to accommodate wider cable bundles. Help reduce stress, pinching, and fatigue on cables, keeping the tray organized.

Installation Considerations Ensure the exit component is securely fixed to the tray or ladder to prevent movement. Maintain the minimum bend radius for cables as they exit the tray to avoid damage. Select materials based on environmental conditions: stainless steel for corrosive environments, galvanized steel for general industrial use. Use exit plates or clips in both horizontal and vertical cable routing to protect cables and facilitate neat installation.
Applications Cable tray exits are widely used in: Industrial plants and manufacturing facilities Data centers and server rooms Commercial buildings and infrastructure projects Power distribution and contr...

Homepage Industrial installations Cable support systems Accessories, mesh cable trays Cable exit plate

Cablofil CABLEXIT100PG Cable Tray Mounting Bracket,

Protects cables when exiting and entering tray. Snap-in mounting tabs eliminate the need for attachment hardware and reduces install time.

TRIPP LITE Cable Exit Clip, Dropout Waterfall Shape

CABLE DROPOUT: This SmartRack exit clip helps reduce bend-induced stress, pinching, pressure points and fatigue in your wire mesh cable

Cable Exit Clip/Dropout Waterfall for Wire Mesh Cable

Maintain the perfect bend radius when dropping cable bundles through the bottom of your wire mesh cable tray. This rugged metal cable exit clip is 45 mm wide.

Wire Mesh Trays | Cable Tray and Reels

The Basic Dropout (BDO) smooths the transition of cabling dropping out of wire mesh tray. These dropouts snap into place without hardware and reduce the

Cable Tray Systems | Efficient Cable Management

Cable tray systems provide a structured and efficient solution for routing and supporting electrical and data cables in commercial and industrial environments.

Tripp Lite SRWBDROP Cable Exit Clip/Dropout Waterfall for Wire

Metal cable dropout maintains a proper bend radius for copper cables that are routed down through the wire mesh cable tray in your data center. Maintains a bend radius while dropping cables through the

Cable Exit Clip/Dropout Waterfall for Wire Mesh Cable Trays, 45 mm

This SmartRack® exit clip helps reduce bend-induced stress, pinching, pressure points and fatigue in your wire mesh cable tray system. It mounts to the cross member of the tray to route copper cables

Cable Tray Accessories, Cable Tray Hangers & Support | RS

What types of cable tray accessories are there? There are several different types of cable tray accessories, which are available in heavy-duty, medium-duty, or light-duty strengths. The type of

Waterfall Exit Fittings

TechLine manufactures waterfall exit fittings to enhance ease of use for our cable tray systems as mount directly to existing tray without alterations!

Cable Exit Clip/Dropout Waterfall for Wire Mesh Cable Trays, 90 mm

Ensures a Proper Bend Radius to Reduce Cable Stress and Keep Your Cable Tray Organized This SmartRack® exit clip helps reduce bend-induced stress, pinching, pressure points and fatigue in

TRIPP LITE Cable Exit Clip, Dropout Waterfall Shape

It mounts to the cross member of the tray to route copper cables down through an opening in the wire. The SRWBDROP is 45 millimeters wide and

Cable Tray Technical Guide A practical guide to product selection and ...

Cable tray installed in a hazardous location must contain only those cables that are appropriate for this type of environment as defined in Chapter 5 of the NEC.

Exit plate SPB/OE EX SS

Exit Plates used to safely support cables over the side rail or ends of cable trays and OE cable ladders. Can also be used on Mekano® CH100-2T. Design of holes is
