Araziyah Safety Infrastructure (Pty) Ltd

Columbia Cable Management Frame Specifications

AI Overview

Columbia Cable Management Frames are designed for 19-inch rack compatibility, offering multiple rack units, vertical cable management, and modular mounting options.General Frame SpecificationsColumbia Cable Management Frames are engineered to support standard 19-inch EIA rack-mounted equipment. Typical frames provide 24 to 45 rack units (RU) depending on the model, with threaded attachment points using 12-24 roll-formed threads for secure equipment mounting . The frames are usually constructed with L-shaped base angles and C-shaped equipment-mounting channels, allowing for bolt assembly and optional baying with other racks or 2-post relay racks .DimensionsHeight: Approximately 7 feet (84 inches) for full-size frames Width: Around 20.3 inches for standard frames Depth: Typically 15 inches, though some models may vary depending on cable management requirements Cable Management FeaturesVertical Cable Managers: The sides of the frame are punched to allow attachment of vertical cable managers, providing organized routing for patch cords and fiber cables .T-shaped Cable Guides: Openings along the vertical managers are formed by evenly spaced T-shaped guides, often made from composite plastic, to maintain separation and prevent tangling .Horizontal Cable Management: Some frames include horizontal cable managers or slack storage notches at the bottom of the frame for fiber or copper cabling .Installation and MountingFrames can be installed on concrete floors or raised floors .Assembly includes all necessary hardware for mounting equipment and grounding .Frames are designed to bay with other racks or integrate with 2-post relay racks for scalable network setups .Material and FinishStandard frames are typically black powder-coated steel, though other colors may be available upon request .Frames include grounding kits and may featu...
