

Complete Price List for Norwegian Mesh Cable Trays

AI Overview

Wholesale prices for Norwegian wire mesh cable trays typically range from €20 to €60 per meter, depending on material, size, and supplier, with specialized coatings or stainless steel commanding higher prices.

Overview of Wire Mesh Cable Trays

Wire mesh cable trays are widely used in Norway for industrial, commercial, and utility projects due to their lightweight design, excellent airflow, and ease of installation. They are commonly made from galvanized steel, stainless steel, or aluminum, with additional coatings to resist coastal corrosion and harsh environmental conditions. These trays are essential for routing power, control, and data cables safely and efficiently, particularly in offshore, maritime, and datacenter projects.

Factors Affecting Wholesale Prices

Material Type: Stainless steel and hot-dip galvanized trays are more expensive than standard steel due to corrosion resistance and durability.

Tray Dimensions: Width, height, and mesh size influence the cost per meter. Larger trays for heavy cable loads are priced higher.

Supplier Type: Domestic Norwegian fabricators may charge a premium for compliance with EN standards and local environmental regulations, while international suppliers may offer lower factory-direct prices.

Volume and MOQ: Bulk orders reduce per-unit cost, but minimum order quantities (MOQs) vary by manufacturer.

Project-Specific Requirements: Custom lengths, specialized coatings, or integrated fittings can increase costs.

Typical Wholesale Price Range

Based on international supplier catalogs and Norwegian market conditions:

- Standard galvanized wire mesh trays: €20–€35 per meter
- Stainless steel or hot-dip galvanized trays: €40–€60 per meter
- Custom or heavy-duty trays: €60+ per meter

These prices are indicative and may vary depending on shipping, import duties, and local supplier markups.
