

Congo Coherent Optical Module SFP

AI Overview

The Congo Coherent Optical Module SFP is a pluggable coherent transceiver designed for high-speed optical networks, supporting 100G to 400G data rates with integrated DSP and tunable WDM capabilities.

Overview The Congo Coherent Optical Module SFP is a pluggable coherent optical transceiver that integrates all essential functions for digital coherent optics (DCO), including the coherent DSP, optical modulation/detection, and microprocessor electronics for operation and turn-up. It is designed in a small form-factor pluggable (SFP) module, enabling easy deployment in existing router and switch ports without the density penalties of traditional short-reach optics.

Key Features

- Data Rates:** Supports 100Gb/s and 400Gb/s, with tunable WDM transmission for flexible network deployment.
- Form Factor:** SFP-compatible, allowing pluggability into standard network equipment; also available in QSFP, OSFP, and other pluggable formats for higher capacities.
- Reach:** Single-span unamplified reach up to 80 km, amplified reach up to 120 km, and multi-span amplified reach up to 300 km, suitable for metro, access, and edge networks.
- Power Consumption:** Low power design, typically
