

Distribution Box Lithium Battery Equipment Model

AI Overview

Lithium battery distribution boxes and storage cabinets provide safe containment, fire protection, and power management for lithium-ion batteries in residential, industrial, and EV applications. Types of Lithium Battery Distribution and Storage Solutions

- 1. Safety and Storage Boxes** Lithium battery storage boxes, such as the LithiumSafe Battery Box, are designed to mitigate risks like thermal runaway, fire, and toxic gas release. They feature high-temperature resistant materials, fire-resistant vents, gas filters, and optional active cooling systems for safe charging inside the box. Mobility options like wheels and handles make them suitable for transport and flexible placement.
- 2. Flame-Protected Storage Cabinets** Products like the Lithium Ion Battery Storage Cabinet LBSC-A10 provide secure storage in labs or workshops. These cabinets include self-closing, oil-damped doors, leak-proof sumps, and adjustable shelves capable of supporting heavy battery packs. They also integrate air extraction ducts to remove hazardous vapors during charging cycles, ensuring a controlled environment.
- 3. Power Distribution Units (PDUs)** For applications such as electric vehicles or large battery packs, PDUs manage power distribution and system integration. They connect multiple battery packs in series or parallel, provide short-circuit and leakage current protection, and integrate with master and pack BMS units. PDUs ensure reliable electrical connections, reduce maintenance costs, and support multiple system functions like engine control, charging, and heating.
- 4. UN-Approved Transport and Charging Boxes** The RETRON BOX is an example of a UN-approved solution for safe transport and charging of lithium-ion batteries. It protects against fire, explosion, and flying debris, and allows safe charging through integrated cable guides. These boxes are suitable for e-bikes...
