

Distribution box wire holding device

Overview

Strut channels, often referred to as Unistrut, provide a rigid, pre-drilled framework for supporting panel boxes, conduits, and cables. Wire ducts are rigid cable management channels with slotted sides that allow wires to be routed, separated, and modified as system. These Distribution Boxes enable decentralized installation of the electronics close to the load. The range of applications extends from pure energy distribution in buildings to building automation and through to industrial plants. SMART DISTRIBUTION BOXES FOR FLEXIBLE BUILDINGS. Wieland is your. A distribution box is a low-voltage electrical enclosure that receives incoming power and distributes it safely to multiple outgoing circuits through protective and switching devices such as MCBs, RCDs, RCBOs, fuses, isolators, busbars, neutral bars, earth bars, and surge protective devices. Whether in a home or an industrial facility, this box keeps your electrical setup organized, functional, and efficient.
