

Does iSoftStone have AI servers

AI Overview

iSoftStone is building a full-stack AI ecosystem with advanced AI servers, AI PCs, and enterprise AI platforms, combining hardware, software, and AI services for industrial and enterprise applications. AI Server and Hardware Investments iSoftStone has significantly expanded into AI hardware manufacturing following its acquisition of Tsinghua Tongfang's computer unit, now rebranded as SoftStone Huafang. The company invested approximately \$460 million to establish new AI PC and server manufacturing bases in China, including the Jing-Jin-Ji SoftStone Innovation Manufacturing Base in Beijing and an AI PC factory in Wuxi. These facilities produce Ascend-powered AI servers, liquid-cooled servers, and AI-integrated PCs, designed to meet the growing demand for domestic IT solutions among enterprises and government agencies. The hardware segment has become a major revenue driver, generating over 40% of iSoftStone's total revenue in 2025. Full-Stack AI Strategy iSoftStone implements an integrated software-hardware strategy, creating a closed-loop AI ecosystem from servers and workstations to upper-layer applications. Their AI infrastructure leverages Ascend and Kunpeng technologies, supporting enterprise-level AI model training, inference, and scientific research. The company also develops the HarmonyOS operating system and the Tianxuan MaaS (Model as a Service) platform, enabling algorithm-driven AI and industry-specific intelligent solutions for sectors like banking, healthcare, retail, and agriculture. AI Data and Enablement Services Beyond hardware, iSoftStone provides AI data services, including human annotation, data collection, speech and video analysis, AR/VR data processing, and computational linguistics. Their AI enablement services help organizations integrate AI into existing systems, offering customized enterprise solutions and partnerships with major AI technology providers like NVIDIA, AWS, and Microsoft. This combination of hardware, software, and AI services positions iSoftSt...
