

EU Armored Temperature Measuring Optical Cable Price Inquiry

AI Overview

Exact pricing for European armored DTS fiber optic cables varies by supplier, length, and customization, typically requiring direct inquiry for a quote. European armored distributed temperature sensing (DTS) fiber optic cables are designed for precise temperature monitoring in industrial and infrastructure applications, including tunnels, smart grids, oil and gas facilities, and power networks. These cables are armored for durability, resistant to bending, interference, and harsh environmental conditions, and can withstand high tensile and lateral pressures. They are often compliant with European standards such as EN 54-22 for fire detection. Key factors affecting price:

- Cable length:** Suppliers often set minimum order quantities, e.g., 500 kilometers for customized armored DTS cables.
- Armoring type:** Options include stainless steel spiral tubes, metal-free flexible designs, or tube-in-tube configurations.
- Temperature range and environment:** High-temperature or cryogenic applications, hydrogen-rich atmospheres, or high-pressure environments require specialized coatings and materials, which increase cost.
- Customization:** Graphic printing, packaging, and logo customization are available for large orders, affecting the final price.
- Supplier and region:** European suppliers like Eurofyre provide certified cables, while international manufacturers may offer competitive pricing but require shipping and compliance verification.

Typical procurement approach: Due to the variability in specifications and industrial requirements, suppliers generally provide quotes on request. Interested buyers should contact manufacturers directly, providing details such as required cable length, environmental conditions, and certification needs to receive an accurate price estimate. In summary, while the exact price is not publicly listed, armored European DTS fiber optic cables are specialized industrial products,...

Armored Triad Cable [RTD Color Code Specification, Price, Catalogue]

Contact us today for a quick quote. We manufacture and supply such a diverse selection of armored triad cables that each specification is going to be unique.

DTSX3000 Distributed Temperature Sensor

DTSX measures temperature distribution over the length of an optical fiber cable using the fiber itself as the sensing element and it is ideal for temperature monitoring over long distances and wide areas.

China Computer Cable, Computer Cable Wholesale, Manufacturers, Price ...

Our Computer Cable offers exceptional quality and style within the Optical Fiber category. Sourcing optical fiber cable directly through a proven factory OEM distributor offers better price negotiation and

Thermocouple Cables

Thermocouples are specialized cables used for temperature measurement, converting thermal energy into electrical signals. They are essential in industrial processes, offering accurate, reliable, and fast
