AI Overview

Electrical switch boxes and distribution boxes are enclosures designed to safely house switches, outlets, and wiring connections, available in various sizes, materials, and configurations for indoor and outdoor use.

Types of Electrical Boxes

Switch Boxes: These are metal or non-metallic enclosures specifically designed to house electrical switches. They protect wiring connections and provide a secure mounting point for switches.

Outlet Boxes: Also called utility boxes, these enclosures house electrical outlets and can be single-gang, double-gang, or multi-gang depending on the number of devices.

Power Distribution Boxes: These are larger enclosures used to distribute electrical power from a single source to multiple circuits. They often include circuit breakers, GFCI outlets, and multiple receptacles, suitable for construction sites, workshops, or temporary power setups.

Junction Boxes: Used to connect multiple wires safely, junction boxes protect connections from environmental damage and accidental contact.

Materials and Construction

PVC / Non-Metallic: Lightweight, non-conductive, corrosion-resistant, ideal for residential and light commercial applications.

Steel / Pre-Galvanized: Durable, suitable for metal-sheathed cables or conduit systems, often used in commercial or industrial settings.

Weatherproof / Aluminum: Designed for outdoor or damp locations, preventing moisture penetration and short circuits.

Gang Sizes and Dimensions

Single-Gang: Fits one switch or outlet, typically 2" wide by 4" high.

Double-Gang: Fits two devices, approximately 3"-4" wide by 3.25"-3.75" high.

Multi-Gang: Available in 3, 4, or more gang configurations for multiple devices.

Features and Installation

Adjustable Depth: Some boxes, like the Carlon 1-Gang 21 cu. in. adjustable bracket box, allow depth adjustment to accommodate different wall thicknesses and ensure a flush mount.

Old Work vs. New Work: Old work boxes are designed for retrofit installations in existing walls, while new work boxes are installed during construction.
