

Fiber optic cable and router bridging connection not working

Overview

Restart the fiber modem and router. Verify the router's IP address and subnet mask settings are correct. Fiber optic networks are celebrated for their speed and reliability, but even the best systems can encounter problems. When issues like signal loss, slow speeds, or intermittent connectivity arise, systematic troubleshooting is key. Many fiber internet problems come from dirty connectors or loose plugs, not major faults. These high-speed, high-capacity communication networks are increasingly replacing copper cables, offering superior performance and. Hello there, i am trying to simulate a connection of two routers cisco 2911 routers in packet tracer with optical fiber however i get an error message, " The cable cannot be connected to that port", what could be the problem or procedure on using optical fiber connection between routers.
