

Greece CIF price for 40G SD-WAN devices

AI Overview

The CIF price for 40G SD-WAN devices in Greece is likely in the range of \$25,000–\$40,000 per device, depending on vendor, licensing, and shipping terms.

Vendor Pricing and Licensing For enterprise-grade SD-WAN devices, such as Cisco DNA Enterprise WAN Tier 3 (10G–40G capable), the hardware and license cost per device can range from \$20,000 to \$35,000 depending on the term, support level, and throughput tier. Pricing varies with features like SASE integration, next-generation firewall, and centralized management. Subscription models or multi-year licenses may increase the total cost but often include software updates and support.

CIF Considerations CIF pricing includes cost of goods, insurance, and freight to the destination port in Greece. Typically, shipping and insurance for high-value networking equipment add 5–15% to the base device price. For a \$25,000 device, CIF could add \$1,250–\$3,750, bringing the total to approximately \$26,250–\$28,750 per device. For premium models with advanced features, CIF could reach \$40,000 per unit.

Factors Affecting Final Cost

- Device throughput and features:** Higher throughput (40G) and SASE-enabled devices cost more than standard SD-WAN appliances.
- Quantity:** Bulk orders may reduce per-unit shipping and insurance costs.
- Vendor and support tier:** Premium support and extended warranties increase the total CIF price.
- Customs and import duties:** Greece may impose import taxes or VAT, which are not included in CIF and should be calculated separately.

Recommendation To obtain an accurate CIF quote, contact vendors like Cisco, Fortinet, or Palo Alto Networks with:

- Device model and throughput (40G)
- Desired license term and support level
- Destination port in Greece

Vendors or freight forwarders can provide a precise CIF price including insurance and shipping, which is essential for budgeting and procurement planning. This approach ensures you account for hardware, licensing, shipping, insurance, and potential import duties, giving a realistic total cost for 40G...
