

Hot Channel Fixing Solution for Island Applications

AI Overview

Hot-rolled cast-in channels like fischer FES-H and Halfen HZA provide reliable, high-load fixing solutions for standalone or island applications. Overview of Hot Channel Fixing Systems Hot channel fixing systems are pre-positioned cast-in solutions designed for anchoring in both cracked and non-cracked concrete. They offer mechanical interlocking, which increases load capacity and safety, making them suitable for island applications where independent structural support is required (fischer). These systems are ideal for high-load scenarios, including crane runways, elevator guide rails, and seismic or fatigue-prone environments (Halfen HZA). Key Products fischer FES-H Channels: Hot-rolled channels that integrate with the fischer FiXperience software for design and calculation, allowing precise load optimization and flexible application modeling. They are ETA-approved and can be used with FBC channel bolts for secure anchoring. Halfen HZA Channels: Hot-rolled, serrated channels that provide positive mechanical interlock for reliable load transfer. They are certified for seismic loads, fatigue, and safety-critical applications, including nuclear facilities. HZA channels can absorb vibrations and are suitable for vertical or horizontal cast-in applications. Installation and Design Considerations Pre-positioning: Channels must be fixed in the formwork before concrete casting. After curing, foam fillers or sealing tapes are removed, and channel bolts are inserted to secure base plates or structural elements. Load Optimization: Hot-rolled channels are designed to handle longitudinal and transverse loads, including dynamic or fatigue-related stresses. Software Support: Tools like fischer CHANNEL-FIX allow engineers to model applications, calculate loads, and generate transparent reports for traceable design decisions. Corrosion and Fire Protection: Many hot-rolled channels come with efficie...

fischer Cast-in Channel System

We are the first company to offer anchor channels with an ETA approval in the third load direction. Our portfolio comprises fischer FES C cold-formed and FES H hot-rolled channels in a hot-dip galvanised

Halfen Cast-in channels toothed guarantees positive load transfer

The special toothing/serration guarantees a positive load transfer into the channel. In addition, the channels can also reliably absorb fatigue-related vibrations and therefore meet all the requirements

HALFEN Cast-In Anchor Channel – MOMENT | A Product Brand of

HALFEN Cast-In Anchor Channels also known as the Curtain Wall Channels and Brackets are the ideal basis for easy-to-install, adjustable fixings, saving considerable installation time, resulting in faster

Walraven Channel Systems

Walraven channel fixing solutions provide complete, modular and innovative solutions for all your project requirements, from lightweight to heavy-load

Cast-in channels toothed

The special toothing/serration guarantees a positive load transfer into the channel. In addition, the channels can also reliably absorb fatigue-related vibrations and therefore meet all the requirements

Tools of Titans

Tools of Titans is a compendium of insights, strategies, and habits from over 200 top performers interviewed by author Timothy Ferriss on his podcast, The Tim Ferriss Show. The book is divided

CHANNEL-FIX

The app for the design and calculation of fischer cast-in channels for any applications. It creates flexibility in the design with variable application modelling features. Helps to optimize the design and

Massive channel system FMS. Efficient fixing solution for heavy

Massive channel system FMS. Efficient fixing solution for heavy-duty installations. Massive channel system FMS Efficient heavy-duty installations. Environment and area of application. Pipe mounts

Catalogue Cast-in Channel Systems

Non-serrated hot-rolled Cast-in Channel Systems Hot-rolled Cast-in Channels combining excellent load capacity with high safety and flexibility.

Catalogue Cast-in Channel Systems

Our innovative Cast-In Channel Systems provide answers to these new conditions. Our portfolio comprises fischer FES-C cold-formed, FES-H hot-rolled and the new rollshaped InnoLock FES-RS-S

Rick Astley
