

How much does a 4-core fiber optic cable with power supply cost

AI Overview

4-core fiber optic cables typically range from \$0.03 to \$1.80 per meter, depending on type, jacket, and application. Price Overview The cost of a 4-core fiber optic cable varies widely based on fiber type, construction, and intended use. Single-mode cables, designed for long-distance transmission, generally cost more than multimode cables, which are optimized for shorter runs within buildings or campuses. Typical price ranges include: Basic indoor 4-core cables: around \$0.40 per meter Ruggedized outdoor or armored cables: up to \$1.80 per meter Wholesale or bulk options: starting as low as \$0.03 per meter for large-volume orders Per foot pricing: \$0.09 to \$1.52 per foot for materials only, with retail prices up to \$6 per foot depending on specifications A standard 100-meter reel of single-mode OS2 4-core cable typically costs \$60–\$90, depending on customization and order volume. Factors Affecting Price Fiber Type: Single-mode (OS1/OS2) vs. multimode (OM3/OM4) Jacket Material: Indoor PVC, LSZH (Low Smoke Zero Halogen), outdoor-rated, or armored Installation Environment: Direct burial, aerial, or indoor riser/plenum Length and Bulk Orders: Larger orders often receive tiered discounts Brand and Quality: Premium brands like OWIRE offer tested, high-quality fibers with consistent performance Practical Considerations Single-mode cables are ideal for long-distance backbone or campus networks. Multimode cables are cost-effective for shorter distances, such as within buildings or data centers. Armored or outdoor cables provide durability in harsh environments but increase cost. Bulk purchasing can significantly reduce per-meter costs, especially for large-scale deployments. In summary, when budgeting for 4-core fiber optic cables, expect \$0.03–\$1.80 per meter, with the final price influenced by fiber type, jacket, installation environment, and order volume.
