

Huijue Optical Module 100g Price

AI Overview

The price of a Huawei 100G optical module typically ranges from approximately USD 1,200 to USD 2,500 per unit, depending on type, reach, and form factor. Pricing Overview Huawei 100G optical modules, such as QSFP28 and CFP variants, are high-performance transceivers designed for ultra-fast data transmission at 100 Gbps. According to available price listings, modules like the 100GBase-SR4-MP or 100GBase-LR4 QSFP28 typically cost around USD 1,200–2,500 per module, with short-reach modules generally at the lower end and long-haul or carrier-grade modules at the higher end. Bulk purchases or combination packages with switches may affect the per-unit cost. Factors Affecting Value Form Factor: QSFP28 modules are compact and energy-efficient, ideal for data centers, while CFP/CFP2/CFP4 modules are used for long-haul or metro networks. Transmission Distance: Short-reach (SR) modules are less expensive, while long-reach (LR/ER) modules supporting 10–40 km or more are costlier. Market Trends: The global 100G optical module market is growing rapidly, with prices influenced by demand from data centers, 5G networks, and cloud infrastructure. Market reports indicate strong growth, with modules becoming more efficient and widely adopted, which can stabilize or slightly reduce prices over time. Additional Features: Modules with advanced reliability features, forward error correction (FEC), and thermal resilience may command higher prices. Practical Considerations When purchasing a Huawei 100G module, consider not only the price but also compatibility with existing network equipment, power budget, and future scalability. For enterprise or telecom applications, investing in modules with longer reach and higher reliability may justify the higher cost, while short-reach modules are suitable for high-density data center interconnects. In summary, expect to pay roughly USD 1,200–2,500 per Huawei 100G optical module, with the exact value depending on module type, reach, and additional features, while market growth an...
