

Hybrid Energy System 20kW OEM

Overview

20KW solar hybrid solar system with lithium battery, hybrid inverter and structure, cable. It can be used for home use and projects. This remarkable system combines the best of both. The 20kW off-grid solar packages detailed below are engineered for total self-reliance. Designed by FGET's elite technicians, these standalone systems capture maximum solar yield and store it efficiently—ensuring your life never stops when the grid goes down. What Can This System Run?

A typical. 20kw hybrid solar system kit Solar Panel Power : 20kw-22kw Solar Inverter Output Power : 20kw Battery Storage Power : 20kwh -40kwh -60kwh etc Mounting brackets for different type roof, ground. Including pv combiner box, pv cable, MC4 connectors and installation tool box is optional. Note: This is a commercial/industrial scale system. It is primarily suited for large residences with 10 or more people, car park charging stations, farms, fisheries, livestock, highways, airports.
