

LFS Optical Cable Fusion Splicer

Overview

The LFS-4000 is an optical fiber processing tool designed to splice standard, large-diameter and specialty fibers. Thorlabs' Vytran® Filament Fusion Splicers for Standard, Large-Diameter, and Specialty Optical Fiber or Soft Glass Fiber combine filament fusion technology, a high degree of user process control, and simple operation. These properties make these systems ideal for volume production in manufacturing. AC/DC Adaptor, input: AC100-240V, output: DC13. Li-ion battery Working altitude: 0-5000m. wind speed: $\leq 15\text{m/s}$ Fusion splicing is the process of applying heat to fuse together optical fibers, which minimizes insertion loss and back reflections in the fused component. The LFS-4000 is a dedicated tool for high-volume fiber fabrication for the fiber laser, sensor, medical device, defense and aerospace, fiber-based instrumentation.
