

Manufacturer of Low-Temperature Resistant Cold Aisle Container Racks

AI Overview

Key manufacturers for low-temperature resistant cold aisle container racks include Vertiv, Austin Hughes, Legrand, Maysteel Industries, and SDSHelf, offering customizable and durable solutions for data centers and refrigerated environments. Vertiv provides aisle containment systems designed for both hot and cold aisles, with modular components that can be configured to match specific rack layouts. Their systems include adjustable roof options, twin-wall polycarbonate panels, and thermal drop-out features for fire suppression, making them suitable for low-temperature and edge data center applications. Components are designed for easy installation and can be deployed before racks arrive on site, supporting efficient airflow management and containment in cold environments. Austin Hughes specializes in cold aisle containment solutions that focus on total air isolation to optimize cooling efficiency. Their systems combine aisle containment doors, overhead ceilings, and SR/NSR server racks, ensuring cold air is isolated and directed to IT equipment while hot air is channeled separately. These solutions are suitable for low-temperature operations and can be customized through OEM/ODM services to meet specific environmental or operational requirements. Legrand offers hot and cold aisle containment solutions that maintain peak cooling efficiency by preventing airflow mixing. Their cold aisle containment systems are compatible with in-row cooling and raised floors, and they provide sliding and swinging doors up to 102 inches high. Legrand emphasizes airflow efficiency, energy savings, and equipment longevity, making their racks and containment systems suitable for low-temperature data center environments. Maysteel Industries provides customizable server racks and aisle containment solutions for high-perfor...
