

Method for connecting corners of mesh cable trays

Overview

The answer: use the right connection accessories for a secure, aligned and continuous cable support system. In most cases, sections of wire mesh baskets or electrical cable trays are joined using couplers, bolts, or proprietary connector kits. Systems support and route all types of cables. Depending on the type and version of mesh cable tray, as well as the corrosion protection used, the mesh cable tray systems can be ambient temperatures of - 20 °C to + 120 °C. Far superior to traditional conduit in many applications, cable tray systems offer unparalleled accessibility for maintenance. This is the largest production facility of any basket tray manufacturer in North America and houses our US headquarters, a state-of-the-art assembly area with centralized warehousing and shipping. High-Resiliency Couplers Help You Create Custom Cable Management Schemes The SmartRack® SRWBUNVCPLR includes 50 black powder-coated metal couplers, each with an M6 flange nut and M6.
