

Price of Distribution Box Press Box

AI Overview

Professional audio press boxes typically range from around \$500 to over \$2,000 depending on features and outputs. Typical Pricing

PSC Press Train Passive Audio Distribution Box: This compact, one-input, twelve-output passive press box is priced at approximately \$99 per month for six months using financing, which suggests a total retail price in the range of \$500–\$600. It features transformer-isolated mic-level outputs and a durable waterproof Pelican case.

AudioPressBox APB Series: Models like the APB-112 SB-D or APB-320-C-D-USB are professional, active press boxes with multiple mic/line inputs, DANTE or USB-C connectivity, and 12–16 outputs. These units are higher-end, typically priced between \$1,000 and \$2,000 depending on configuration and output count.

Whirlwind PressPower Series: Wall-mounted or portable active press boxes with multiple transformer-isolated outputs and advanced features like LED meters, phantom power, and internal test tones are generally in the \$1,200–\$2,500 range.

Factors Affecting Price

- Number of Inputs and Outputs:** More outputs or additional digital connectivity (USB-C, DANTE) increases cost.
- Active vs Passive:** Active press boxes with built-in amplification and power supply are more expensive than passive units.
- Portability and Build Quality:** Rugged cases, waterproofing, and battery operation add to the price.
- Brand and Features:** Well-known brands like AudioPressBox, Whirlwind, and PSC often command higher prices due to reliability and professional-grade performance.

Summary

For budgeting purposes, entry-level passive press boxes start around \$500–\$600, while professional active distribution boxes with multiple outputs and advanced features typically cost \$1,000–\$2,500. Prices may vary by vendor, shipping, and optional accessories.
