

Price of Double-Layer Cable Tray Fixing Bracket

AI Overview

Double-layer (or double-tier) cable tray brackets typically range from £20 to £60 per unit, depending on size, material, and supplier.

Overview of Double-Layer Cable Tray Brackets

Double-layer or double-tier cable tray brackets are designed to support two levels of cable trays or ladder systems, allowing efficient vertical cable management in industrial, commercial, or data center installations. They are often pre-assembled trapeze supports made from pre-galvanized or hot-dip galvanized steel, providing high load capacity, corrosion resistance, and long-term durability. Common widths include 100mm, 150mm, and 225mm, with drop lengths around 500mm, suitable for suspending multiple trays securely.

Material and Construction

Steel Types: Pre-galvanized, hot-dip galvanized, or stainless steel (A316/A4) for corrosion resistance.

Load Capacity: Designed to prevent sagging under heavy cable loads.

Installation: Pre-assembled units reduce on-site labor and installation time. Compatible with standard cable tray systems.

Pricing Considerations

Single Units: Typically £20–£60 per bracket, depending on width, material, and supplier. For example, a 225mm double-tier trapeze bracket is in this range for standard pre-galvanized steel.

Bulk Orders: Suppliers often offer trade or bulk pricing, which can reduce the per-unit cost. Contacting the supplier directly is recommended for large projects.

Additional Costs: Fasteners, concrete screws, or mounting hardware may be sold separately and can affect total installation cost.

Suppliers and Availability

Direct Channel UK: Offers a range of double-tier trapeze brackets with fast UK delivery and pre-galvanized steel options.

RS Components: Provides cable tray accessories including brackets, hangers, and supports from multiple brands.

McMaster-Carr: Supplies corrosion-resistant mounting brackets suitable for various cable tray configurations.
