

Price of Double-Sided Power Distribution Box

AI Overview

A complete dual-power distribution box typically ranges from \$150 to \$600 or more, depending on specifications, amperage, and additional features.

Typical Pricing

Consumer/Small Commercial Units: On platforms like Amazon, a 2P100A dual power switch box with automatic transfer features and 220V capability is available, generally priced around \$150–\$300 depending on brand and seller.

Industrial or High-Capacity Units: For larger or more robust systems, including 125A automatic transfer switches with surge protection and voltage regulation, prices can reach \$400–\$600 or higher.

Wholesale or Custom Orders: Chinese manufacturers and distributors offer OEM or custom dual-power switching boxes, where per-unit pricing decreases with bulk orders. Prices vary based on amperage, IP rating, modular design, and customization options.

Factors Affecting Cost

Amperage and Voltage Rating: Higher amperage (e.g., 125A vs 100A) and three-phase systems cost more.

Automatic Transfer Switch (ATS): Units with ATS for seamless switching between power sources are more expensive.

Surge and Voltage Protection: Integrated protection features increase upfront cost but improve safety and longevity.

Material and Enclosure Rating: Weatherproof or IP-rated enclosures for outdoor use carry premium pricing.

Customization: OEM branding, modular busbars, and specialized mounting options can significantly affect price.

Summary

For a standard dual-power distribution box suitable for residential or small commercial use, expect \$150–\$300. For industrial-grade or fully featured units, prices typically range \$400–\$600+, with bulk or custom orders potentially lowering per-unit costs. Always consider additional costs for installation, compliance with local electrical codes, and long-term maintenance when budgeting.
