

Price of Dual-Core Interconnect Optical Cable

AI Overview

Dual-core optical cables typically cost between \$0.13 and \$1.50 per foot, depending on fiber type, jacket, and application. Dual-core (or 2-core) fiber optic cables are a type of multi-core fiber where two separate cores transmit light independently, often used for FTTH, data centers, or interconnect applications. Pricing varies based on fiber type (single-mode or multimode), jacket material, strand count, and whether the cable is pre-terminated. Typical Price Range Wholesale bulk purchases: \$0.09 to \$1.52 per foot. Retail or pre-terminated assemblies: \$1 to \$6 per foot, depending on connector type and fiber count. 2-core FTTH drop cables: Around \$0.13 per foot for simple, LSZH jacketed cables. Factors Affecting Cost Fiber Type: Single-mode fiber is generally \$0.10-\$0.50 per foot, while multimode fiber ranges \$0.30-\$1.00 per foot. Jacket Rating: Indoor riser-rated cables are cheaper than plenum-rated or armored cables suitable for harsh environments. Pre-termination: Factory-terminated cables with connectors cost more than bulk cable. Length and Strand Count: Longer cables and higher strand counts increase the price proportionally. Where to Buy DigiKey and Mouser Electronics offer Interconnect Series fiber optic cables with inventory, datasheets, and pricing for immediate purchase. Alibaba provides wholesale options for 2-core fiber optic cables suitable for FTTH networks. In summary, a dual-core interconnect optical cable can cost as low as \$0.13 per foot for basic FTTH applications, while more robust or pre-terminated versions may reach \$1-\$6 per foot depending on specifications and vendor.
