

Price of Green Fiberglass Cable Trays

AI Overview

High-quality green fiberglass cable trays typically range from \$50 to \$200 per meter, depending on size, load capacity, and customization. Overview Green fiberglass cable trays, also known as FRP (Fiber Reinforced Polymer) or GRP (Glass-Reinforced Polymer) trays, are valued for their corrosion resistance, high strength, flame retardancy, and lightweight properties. They are widely used in chemical plants, offshore platforms, water treatment facilities, and industrial environments where traditional steel trays may corrode or fail. Factors Affecting Price Material Quality: Trays made from high-grade pultruded fiberglass with embedded flame retardants and stainless steel shielding mesh are more expensive due to durability and safety features. Size and Load Capacity: Wider trays or those designed for heavy-duty applications cost more. Standard widths range from 50mm to 600mm, with lengths typically 1-3 meters. Customization: Suppliers often offer custom designs, color options, and specific load ratings, which can increase the price. Certifications and Standards: Products certified to ISO 9001, ISO 14001, ISO 45001, or meeting RoHS and REACH requirements may carry a premium due to verified quality and compliance. Supplier Location and Shipping: International shipping or sourcing from specialized manufacturers can affect the final cost. Typical Price Range Light-duty trays: \$50-\$80 per meter Medium-duty trays: \$80-\$130 per meter Heavy-duty or highly customized trays: \$130-\$200+ per meter These ranges are indicative; actual prices vary based on supplier, order volume, and specific project requirements. For precise pricing, it is recommended to contact suppliers directly such as Nanjing Hypro Composites, Creative Composites Group, or Alibaba-listed manufacturers. Additional Considerations Accessories: Couplers, bends, risers, and lids may be sold separately and add to the total cost. Installation and Maintenance: FRP trays are lightweight and corrosion-resistant, reducing long-term maintenance costs compared to steel altern...
