

Price of Smart Distribution Box for Terrace

AI Overview

Smart distribution boxes for terrace or outdoor use typically range from ₹1,500 to ₹10,000 depending on capacity, material, and smart features. Price Range and Options For residential terrace installations, small waterproof ABS or fiberglass smart distribution boxes with 2-4 ways generally cost between ₹1,500 and ₹3,500 in India, offering IP65 weatherproofing suitable for outdoor use (Flipkart). Larger modular or multi-circuit smart distribution boards with advanced monitoring, remote control, and expandable configurations can range from ₹5,000 to ₹10,000 or more, especially for commercial or high-capacity applications (Alibaba, Made-in-China). Key Features Affecting Price Material: ABS plastic or fiberglass enclosures are common for outdoor use; fiberglass tends to be more durable and corrosion-resistant. Weatherproofing: IP65 or higher ensures protection against rain, dust, and moisture. Smart Capabilities: Real-time monitoring, load management, and remote control increase cost. Number of Circuits: More circuits or modular expandability raises the price. Voltage and Amperage Ratings: Higher capacity boards for heavy loads or three-phase systems are more expensive. Installation Considerations The total investment includes not only the purchase price but also installation costs, which may vary depending on terrace accessibility, wiring complexity, and compliance with local electrical codes (Sunnom). Outdoor-rated boxes may require additional mounting hardware or protective enclosures to ensure safety and longevity. Recommendations For basic residential terrace use, a 2-4 way waterproof ABS smart distribution box is cost-effective and sufficient. For larger or expandable systems, consider modular smart distribution boards with monitoring features to future-proof your installation. Always verify IP rating, material quality, and compliance with local electrical standards before purch...
