

Price of Wall-Mounted Foldable Network Cabinets

AI Overview

Wall-mounted foldable network cabinets typically range from \$50 to \$500+, depending on size, features, and brand.

Price Range and Options

Entry-Level Cabinets: Small 1U to 4U foldable cabinets suitable for home or small office setups generally cost \$50–\$150. These often feature a foldable front door, side ventilation, and basic mounting hardware, ideal for routers, switches, or DVRs.

Mid-Range Cabinets: Cabinets with 6U to 12U capacity, reinforced construction, and lockable doors typically range from \$150–\$300. These provide better load capacity, improved airflow, and more secure mounting for multiple network devices.

High-End or Industrial Cabinets: Larger foldable or swing-out wall-mounted cabinets designed for edge computing, telecom rooms, or data centers can cost \$300–\$500+. These often include modular rails, advanced thermal management, and optional fan kits for high-density equipment.

Key Features Affecting Price

Size (U height): Cabinets range from 1U to 12U or more; larger units cost more.

Load Capacity: Higher weight support increases cost; small cabinets may support 10–50 kg, while industrial models handle 200 lbs or more.

Material and Build: Steel or reinforced metal cabinets with lockable doors and tempered glass are more expensive than basic sheet metal units.

Foldable or Swing-Out Design: Cabinets with 90-degree foldable doors or swing-out rails for easy access are priced higher due to added convenience and engineering.

Accessories: Included mounting hardware, cable management, and optional fan kits can influence the final price.

Where to Buy

Amazon: Offers a wide range of foldable wall-mounted cabinets starting around \$50 for small units up to \$300 for larger, lockable models.

Manufacturer Websites: INTOS, Chatsworth Products, and nVent HOFFMAN provide industrial-grade cabinets with instant quotes and configurable op...
