

Price quote for flame-retardant cable trays in Spain

AI Overview

Flame-retardant cable trays in Spain typically range from €25 to €80 per meter, depending on material, fire rating, and load capacity. Price Overview The cost of flame-retardant cable trays varies based on several factors:

- Material and Fire Rating:** Steel or aluminum trays with fire-resistant coatings or certifications generally cost more than standard trays. Heavy-duty fire-rated trays designed for industrial or critical facilities are at the higher end of the price range (around €60–€80 per meter) while lighter-duty options for commercial buildings may cost €25–€50 per meter.
- Tray Dimensions:** Width, height, and load capacity affect pricing. Wider trays or those supporting heavier loads require more material and stronger fireproofing, increasing costs.
- Supplier and Quantity:** Bulk orders from B2B suppliers in Spain, such as those listed on Europages, may reduce per-meter costs, while small orders or custom sizes may be more expensive.
- Additional Fire Protection:** Some trays are coated with fire-retardant materials like Thermalastic® 83C or FLAMMOTECT-A, which enhance fire resistance but add to the cost.

Purchasing Guidance

Request Quotes: Contact local suppliers or distributors directly to get accurate pricing for your specific requirements. B2B marketplaces in Spain list multiple suppliers for flame-retardant cable trays.

Consider Installation Costs: Installation may require specialized hangers, supports, or fireproofing measures, which can add to the total project cost.

Check Certifications: Ensure the trays meet local fire safety standards and building codes, especially for hospitals, data centers, or industrial facilities.

In summary, while typical prices range from €25 to €80 per meter, the final cost depends on material, fire rating, dimensions, and supplier. For precise budgeting, obtaining multiple quotes from Spanish suppliers is recommended.
