

Router recommendation 100M fiber optic cable

AI Overview

For a 100-meter fiber optic connection, a high-performance router with multi-gig Ethernet ports and Wi-Fi 6 or 7 support is recommended.

Key Considerations

Ethernet Cable Length: Standard Cat6 or Cat6a cables can reliably transmit gigabit speeds up to 100 meters, making them suitable for connecting your fiber ONT to a router over this distance. Ensure the router has 1G or multi-gig ports to fully utilize your fiber plan.

Speed and Standards: Choose a router that supports Wi-Fi 6 (AX) or Wi-Fi 7 for maximum wireless performance. These standards handle multiple devices efficiently and provide high throughput for streaming, gaming, and large file transfers.

LAN Ports: For wired connections, a router with at least 4 gigabit LAN ports is recommended. Some high-end models offer multi-gig or 10G ports for LAN aggregation, which can combine ports for faster speeds.

Coverage: Consider the size of your home or office. Routers with strong internal antennas or mesh capabilities ensure stable connectivity across large areas.

Recommended Routers

- NETGEAR Nighthawk Tri-Band WiFi 7 Router (RS700S)**
 - Supports Wi-Fi 7 and multi-gig speeds
 - 10G WAN/LAN ports and four 1G LAN ports
 - Excellent range and performance for large homes or offices
 - Ideal for gaming, streaming, and AR/VR applications
- TP-Link AX1800 Archer AX21**
 - Wi-Fi 6 dual-band router
 - Speeds up to 1.8 Gbps (1200 Mbps on 5 GHz, 574 Mbps on 2.4 GHz)
 - OFDMA and MU-MIMO for multiple devices
 - Beamforming technology for extended coverage
- ASUS Tri-Band Wi-Fi 6 Router (Mesh Capable)**
 - Tri-band with dedicated 5 GHz band for gaming
 - Eight gigabit ports and mesh network support
 - Covers up to 5,500 sq. ft., suitable for large homes

Setup Tips

- Use Cat6a Ethernet cable for the 100-meter run to minimize signal loss.
- Connect the fiber ONT to the router's WAN port.
- Enable QoS (Quality of Service) if multiple devices are connected.
