

ST01 Interface Protective Cover

Pre-Terminated Patch Panel

Multi-application support Flexible configuration Modular design

Overview

Power class: 1,6 A to 7,5 A Type series: ST01 Features normally open resets automatically with connector cables Mylar-Nomex insulation Main parts 1) Ceramic cover plate 2) stationary silver contact 3) spring disc 4) movable contact 5) Conductive housing 6) bimetal disc. Power class: 1,6 A to 7,5 A Type series: ST01 Features normally open resets automatically with connector cables Mylar-Nomex insulation Main parts 1) Ceramic cover plate 2) stationary silver contact 3) spring disc 4) movable contact 5) Conductive housing 6) bimetal disc. Stationary silver contact are riveted with ceramic cover plate. The movable contact are welded to the spring disc, which is in the shape of a cross, and the four feet are connected to the bottom of the housing. The inner hole of the bimetal disc is placed on the spring disc through the movable contact. The current pass through the stationary silver contact to the movable contact with the stationary silver contact. ST01 Series Thermal Cut-Outs are designed for the over-heat protection of electric motors, transformers and all types of coils, as well as electronic components and printed circuit boards. Designed as an economical solution, especially for motor, transformer, and lighting applications up to 5 amps, 250 VAC.
