

Smart PDU surge protector

Overview

The intelligent PDU surge protector (intelligent meter type) is mainly used for end-stage protection of 220VAC power supplies and is widely applied in backend machines, video surveillance systems, household appliances, and other terminal devices. Intellinet PDUs (Power Distribution Units) and rack power strips provide a reliable solution for power distribution in network cabinets, server racks, and professional IT infrastructures. It not only effectively counteracts the threats of lightning strikes and surges but also provides power monitoring. The 19" 1U Rackmount 6-Outlet Smart PDU / Surge Protector from Intellinet Network Solutions safely distributes and monitors power to the equipment in your network rack, server room or data center. It features six metered US NEMA 5-15R outlets with remote access and control, complimented by one. Managing power in a server rack used to mean plugging everything into a basic power strip and hoping for the best.
