

Specifications and dimensions of a four-way power distribution box

AI Overview

A 4-way power distribution box typically features four outlets, compact dimensions, and robust construction for safe power distribution in various environments.

General Specifications

Outlets: 4-way configuration, often supporting 16A or 32A per outlet depending on the model.

Voltage Options: Commonly available in 24V, 110V, and 220V configurations for industrial and site applications.

Protection Rating: IP44 for standard portable units, IP66 for hazardous area models, ensuring dust and water resistance.

Material Construction: Options include GRP (Glass Reinforced Polyester) for corrosion resistance and lightweight durability, or steel enclosures for robust site use.

Mounting Type: Surface-mounted or flush-mounted, depending on installation requirements.

Certifications: ATEX and IECEx certified for hazardous environments, suitable for Zones 1, 2, 21, and 22.

Dimensions and Weight

Portable 110V 16A model: 225 mm (width) x 130 mm (depth) x 250 mm (height), weighing approximately 3.1 kg.

Industrial GRP hazardous area model: Dimensions vary with cable length and configuration; typically designed for portability with handles or stainless-steel stands, supporting cable lengths from 5 to 100 meters.

HT-4 Distribution Box: Designed to accommodate up to 4 circuit breakers; exact dimensions depend on manufacturer specifications but are suitable for residential, commercial, or industrial setups.

Additional Features

Portability: Many units include integrated handles or stands for mobile use.

Cable Options: Rubber or SY braided cables, customizable lengths for site-specific requirements.

Applications: Suitable for construction sites, workshops, oil and gas facilities, chemical plants, marine environments, and temporary power setups.

Internal Components: Typically include neutral and earth copper bars, terminal blocks, and protective covers for safe operation. These specifications ensure that a...
