

Sri Lanka Metallurgical Cable Tray Specifications

AI Overview

Metal cable trays in Sri Lanka are available in various materials, finishes, and sizes, designed for heavy-duty and industrial applications with high corrosion resistance and load-bearing capacity. Materials and Finishes Metal cable trays in Sri Lanka are manufactured using mild steel, zinc-coated steel, zinc-aluminium (Zn/Al), stainless steel, galvanized, and hot-dip galvanized steel. These materials ensure strength, durability, and corrosion resistance, making them suitable for indoor, outdoor, and industrial environments. Powder-coated finishes are also available for enhanced aesthetics and additional protection in indoor applications. Types and Configurations Cable trays come in ventilated, solid, ladder, and trunking configurations to support different cable types and heat dissipation requirements. Standard straight lengths are commonly used, with accessories such as bends, tees, reducers, couplers, and supports to allow flexible routing and secure installation. Dimensions and Thickness Tray thickness typically ranges from 0.8 mm to 3.0 mm, selected based on load requirements, span, and application. For example, hot-dip galvanized straight length trays may use 1.5 mm thick sheet metal with matching lids and bolted joints for secure assembly. Standard sizes include widths and heights such as 100 mm x 50 mm, but custom dimensions are available depending on project needs. Standards and Compliance Many Sri Lankan cable trays comply with EN 61537 for cable management systems and EN ISO 1461 for hot-dip galvanization, ensuring mechanical strength, durability, and corrosion resistance. Coating thickness for hot-dip galvanized trays typically ranges from 55–70 microns, depending on steel thickness. Applications Metal cable trays are widely used in industrial plants, commercial buildings, power stations, data centers, and utility infrastructure. They...
