

Sudanese Large-Span Cable Tray Brands

AI Overview

Sudan currently has limited local manufacturers of large-span cable trays, so sourcing often involves regional suppliers or international distributors. Overview Large-span cable trays are structural systems designed to support heavy electrical and communication cables over long distances, commonly used in industrial plants, power stations, and infrastructure projects. In Sudan, the local manufacturing sector for heavy-duty cable trays is limited, so most projects rely on imported solutions from nearby regions such as the Middle East or North Africa. Regional Suppliers While Sudanese manufacturers are scarce, companies in Saudi Arabia, UAE, and Egypt provide large-span cable trays suitable for Sudanese projects: Integrated Steel Plant (ISP), Saudi Arabia: Offers cable ladders, wire mesh basket trays, and heavy-duty cable racks with international standards, suitable for industrial and utility projects. Saudi Pultrusion Industries (SPI): Supplies pultruded composite cable trays with spans up to 6 meters, corrosion-resistant and fire-retardant, ideal for harsh environments. WESCOSA and Power Solution Industries (PSI), Saudi Arabia/UAE: Provide cable trays, trunking systems, and GRP solutions for industrial, marine, and oil & gas sectors. These suppliers often ship to Sudan and can provide custom sizes, perforated or solid trays, and accessories for large-span installations. Sourcing Strategies in Sudan Import from Regional Manufacturers: Contact Saudi or UAE suppliers for quotations and shipping options. Many have experience supplying projects in Africa. Local Distributors: Some Sudanese electrical and industrial distributors may stock standard cable trays or act as agents for regional manufacturers. Custom Fabrication: For very large spans or specialized projects, local steel fabricators can manufacture cable trays based on imported designs and specifications. Material Considerations: For outdoor or industrial installations, consider hot-dip galvanized steel, stainless steel, or pultruded composites to resist corrosion...
