

Syrian Cable Tray Material Customization Price Inquiry

AI Overview

Cable trays in Syria can be customized in materials such as hot-dip galvanized steel, stainless steel, or halogen-free plastic, with prices varying based on type, length, and fittings. Material Options Syrian cable trays are available in several materials suitable for different environments and load requirements: Hot-dip galvanized steel: Offers high corrosion resistance and is commonly used for industrial and commercial installations. Stainless steel: Ideal for harsh or outdoor environments where additional corrosion protection is needed. Halogen-free plastic: Lightweight, fire-resistant, and suitable for areas requiring low fire load. Standard Sizes and Customization Standard cable tray lengths are typically 2.4 meters, but manufacturers can provide custom lengths and widths depending on project requirements. Fittings such as elbows, tees, and reducers are priced per unit and can be customized to match the tray material and load capacity. Cable ladders (with cross-members) are preferred for heavy power cables, while solid or perforated trays are used for lighter or mixed cabling. Pricing Considerations Prices depend on material type, tray dimensions, and quantity. Hot-dip galvanized ladder-type trays are commonly priced per standard 2.4-meter section, with fittings priced separately. Bulk orders or long-term supply agreements with verified Syrian manufacturers may offer discounted rates. Suppliers in Syria Syria Cables is a leading manufacturer of electrical cables and related infrastructure, offering high-quality products and customization options for industrial and commercial projects. Verified suppliers can be contacted through B2B platforms like Go4WorldBusiness and Tradewheel, which list Syrian cable tray manufacturers and importers for price inquiries. Recommendations Specify the material, load requirements, and tray length when re...
