

## Three-level distribution box 2p

### Overview

The Larson Electronics MPD-PNL-3P-MCB-125A-230V-N3R-3X20A. 2P Power Distribution Panel is designed for reliable, safe and convenient power distribution at industrial work sites. This 125-amp unit provides 230V three phase via a main circuit breaker panel. In a newly constructed residential area, a 10kV power line is introduced into the substation. After stepping down the voltage through the transformer's low-voltage side (0. 4kV), power distribution is achieved through three levels of distribution boxes: the main distribution board, secondary. The SVB 3 power distribution box has a 230V Schuko plug with strain relief as input and three 230V Schuko sockets as outputs. - CEE plug collar 16ACircuit breaker poles refer to how many conductors (wires) a breaker can disconnect. And if your system has significant neutral. Poke-Through Base Unit, 3 Inch Drill Size, 16-1/4 Inch Length, 1/2 Inch and 3/4 Inch Knockouts, Galvanized Steel, with 1 20A Duplex Receptacle and 2 Data Jacks, City of Chicago Approved Easy to use poke-through provides an ideal power and data solution; ideal for new construction or upgrading. To meet all specifications (practices, speed of implementation, ease of maintenance, continuity of service, etc.
