

Uruguay DAC High-Speed Cable 100G

Overview

100G DAC Cables (QSFP28) are cost-effective, pre-terminated twinax copper assemblies designed for short-reach high-speed interconnects in modern data centers, enterprise networks and SANs. Get your 100G direct attach cables from nearby warehouses. It is suitable for data interconnection between ten gigabit switches within racks and adjacent racks to maximize the demand for high-density cabling interconnection systems in emerging data. 100G DAC Cables from JTOPTICS are Direct Attach Copper cables ideal for short-distance, cost-effective connectivity in top-of-rack or intra-rack applications. End-to-end design, manufacturing, and supply-chain orchestration for assemblies—from simple box builds to complex, fully wired electrical cabinets—delivered to spec and certified for any environment. With our technological expertise and advanced manufacturing capabilities, you can save on R&D costs. Four-channel DAC assemblies support bandwidths up to 100 Gbps. Excellent for server connections where space is limited. Foldable cable helps maximize airflow for effective thermal management.
