

Uruguay Warranty Edge Data Center IP67

AI Overview

Edge Data Center equipment in Uruguay, including IP67-rated devices, is covered under Edgecore Networks' standard hardware warranty, with local service facilitated through authorized resellers or data center partners. Warranty Coverage Edgecore Networks provides a limited warranty for its products, effective from the date of purchase. The warranty applies to bare-metal hardware and is non-transferable, covering defects in materials and workmanship under normal use. Proof of purchase is required to claim warranty service, and registration of the product within 30 days of purchase is recommended to protect your rights. The warranty does not cover damage from misuse, improper installation, unauthorized repair attempts, accidents, or natural hazards. Liability is limited to repair or replacement of defective products, excluding incidental or consequential damages. For products sold through EDGE Computer Technologies, warranty claims require presenting the official receipt or sales invoice, original packaging, and accessories. A service form is issued for defective items, which must be submitted for processing. Replacement or repair may be subject to inventory availability, and upgrades may require payment of the price difference.

IP67 Considerations IP67-rated devices are dust-tight and water-resistant, suitable for harsh environments. While the warranty covers hardware defects, it is important to ensure that the device is used within its intended environmental specifications, as damage from improper exposure to water or dust beyond IP67 limits may not be covered.

Data Center Support in Uruguay Uruguay hosts several Tier III-certified data centers with high availability, redundancy, and security for hosting Edge Data Center equipment. Facilities such as Antel Data Center provide 24/7 physical security, redundant power, and cooling systems, ensuring optimal operation for sensitive hardware. Other providers, including WNPow, offer multiple locations with BGP routing, perimeter protection, and cold-hot aisle designs to main...
