

West Asia Optical Cable Splicing Company

Overview

A submarine communications cable is a cable laid on the between land-based stations to carry across stretches of ocean and sea. The first submarine communications cables were laid beginning in the 1850s and carried traffic, establishing the first instant telecommunications links between continents, such as the first which became operational on 16 August 1858. By 1872 all the continents.

AI Overview

Key suppliers of optical cable splicing equipment for West Asia include AZTEL, JILONG Communications, Fiberik, and AFL, offering fusion splicers, OTDRs, and full fiber optic solutions. AZTEL Corporation AZTEL provides professional telecommunication solutions, including fiber optic splicing machines, OTDRs, and test equipment. They manufacture, engineer, and install telecommunication products suitable for network upgrades and new installations. AZTEL emphasizes safety, quality, and timely delivery, and offers training for broadband providers and contractors. While based in Malaysia, their products and services can be supplied to West Asia markets. JILONG Communications JILONG, based in China, has over 30 years of experience in optical communication. They manufacture optical fiber fusion splicers, OTDRs, fiber cutters, and measuring instruments, and have contributed to national standards for fusion splicers. JILONG's products are widely used by telecommunications operators and are suitable for deployment in West Asia due to their global distribution network. Fiberik Fiberik specializes in FTTx solutions, optical transceivers, air-blown fiber products, and cable installation fittings. They provide high-quality fiber optic products at competitive prices and support large-scale network projects. Their offerings inclu...
