

Wholesale Price of Optical Module Communication

AI Overview

Wholesale prices for communication optical modules vary widely, typically ranging from \$50 to \$1,500 per unit depending on speed, form factor, and transmission distance. Overview of Optical Modules Communication optical modules, also known as optical transceivers, convert electrical signals into optical signals for high-speed data transmission in fiber-optic networks. Common types include SFP, SFP+, SFP28, QSFP+, QSFP28, QSFP-DD, and OSFP, supporting speeds from 10G to 400G and beyond. Modules differ by form factor, data rate, transmission distance, and connector type, which directly influence wholesale pricing. Typical Wholesale Price Ranges 10G SFP/SFP+ modules: \$50–\$150 per unit, suitable for short- to medium-range applications. 25G/40G QSFP+ modules: \$150–\$400 per unit, commonly used in enterprise and data center networks. 100G QSFP28 modules: \$400–\$800 per unit, supporting high-density data center interconnects. 200G/400G QSFP-DD or OSFP modules: \$800–\$1,500 per unit, designed for AI clusters, high-performance computing, and next-generation data centers. Prices can vary based on single-mode vs. multi-mode fiber, short-range (SR) vs. long-range (LR) modules, and vendor brand. Bulk orders often qualify for discounts, and OEM/ODM customization may affect pricing. Purchasing Options Direct from manufacturers: COBTEL, ETULINK, and Unitek fiber offer factory pricing and bulk order options. Wholesale marketplaces: Made-in-China and Global Sources list verified suppliers from China, India, and Korea, providing competitive pricing and customization options. Negotiation and bulk discounts: Many suppliers provide cost-saving solutions for large-volume purchases, especially for enterprise or data center deployments. Key Considerations When sourcing wholesale optical modules, consider: Compatibility with existing network h...
